## SKYBRIDGE INVEST JSC

### STATEMENT OF MANAGEMENT'S RESPONSIBILITIES FOR THE PREPARATION AND APPROVAL OF THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2024

Management of SkyBridge Invest JSC (hereinafter – the “Company”) and its subsidiaries (hereinafter collectively – the “Group”) is responsible for the preparation of the consolidated financial statements that present fairly, in all material respects, the financial position of the Group and its subsidiaries as at 31 December 2024 and the financial results of its activities, cash flows and changes in equity for the year ended on these dates, in accordance with International Financial Reporting Standards (hereinafter – IFRS).

In preparing the consolidated financial statements, management is responsible for:

- properly selecting and applying accounting policies;
- presenting information, including accounting policies, in a manner that provides relevant, reliable, comparable and understandable information;
- application of reasonable and expedient estimates and;
- providing additional disclosures when compliance with the requirements of IFRS is insufficient for users of the consolidated financial statements to understand the impact of transactions, as well as other events and conditions on the financial position and financial results of the Group's operations; and
- assessment of the Group's ability to continue as a going concern in the foreseeable future.

Management is also responsible for:

- designing, implementing and maintaining the effective and reliable functionality of the internal control system of the Group;
- maintaining adequate accounting system, that are sufficient to show and explain the Group's transactions and allowing the preparation of information about the Group's financial position at any time with reasonable accuracy, and to ensure compliance of financial statements with IFRS;
- maintaining statutory accounting records in compliance with legislation and accounting standards of the Republic of Kazakhstan and IFRS;
- adopting measures within its competence to safeguard assets of the Group; and
- preventing and detecting fraud and other irregularities.

The consolidated financial statements of the Group for the year ended 31 December 2024 were approved by management on 26 March 2025.

  
Sundetova Z. S.  
Chairman of the Management Board

## INDEPENDENT AUDITOR'S REPORT

### To the member and the management of the SkyBridge Invest JSC

#### Opinion

We have audited the accompanying consolidated financial statements of SkyBridge Invest JSC (hereinafter – the Company) and its subsidiary (hereinafter – the Group) which comprise the consolidated statement of financial position on 31 December 2024, the consolidated statement of profit or loss and other comprehensive income, the consolidated statement of changes in equity and the consolidated statement of cash flows for the year ended 31 December 2024, and a summary of significant accounting policies and other explanatory notes (hereinafter – the consolidated financial statements).

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the financial position of the Group on 31 December 2024, and its financial performance and its cash flows for the year then ended in accordance with International Financial Reporting Standards (IFRS).

#### The basis for the expression of opinion

We conducted our audit in accordance with International Standards on Auditing (ISA). Our responsibilities in accordance with these standards are described further in the “Auditor’s Responsibility for the Audit of the Financial Statements” section of our report.

We are independent of SkyBridge Invest JSC in accordance with the *International Ethics Standards Board for Accountants’ Code of Ethics for Professional Accountants* (IESBA Code), and we have fulfilled our other ethical responsibilities in accordance with the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

#### Responsibility of management for the preparation of consolidated financial statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with IFRS and for the internal control system that management considers necessary to prepare consolidated financial statements that are free from material misstatement due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the ability of the Group to continue to operate continuously, for disclosing, as appropriate, information related to business continuity, and for preparing statements based on the going concern assumption, unless management intends to liquidate the Group, terminate its activity or when it does not have any other real alternative, except liquidation or termination of activity.

Those responsible for corporate governance are responsible for overseeing the preparation of the consolidated financial statements of the Group.

#### Responsibility of the auditor for the audit of consolidated financial statements

Our goal is to obtain reasonable assurance that the financial statements are free from material misstatement, whether due to fraud or error, and to issue an auditor’s report containing our opinion.

Reasonable assurance represents a high degree of assurance but is not a guarantee that an audit conducted in accordance with International Standards on Auditing will always reveal material misstatement, if any. Misstatements may be the result of fraud or error and are considered material if it can reasonably be assumed that, individually or collectively, it may affect the economic decisions of users based on these financial statements.

We apply professional judgment and maintain professional skepticism throughout the audit as part of the audit conducted in accordance with the International Auditing Standards. In addition we do the following:

- identify and assess the risks of material misstatement of financial statements due to fraud or error; develop and perform audit procedures in response to these risks; obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is greater than the risk of not detecting a material misstatement resulting from error, because fraud may involve collusion, forgery, intentional omission or misrepresentation, or override of internal controls;
- obtain an understanding of the internal control system related to the audit for the purpose of developing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control system;
- evaluate the appropriateness of the accounting policies applied and the reasonableness of accounting estimates and related disclosures prepared by management;
- conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether there is a material uncertainty related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. your activities. If we conclude that a material uncertainty exists, we are required to address the relevant disclosures in the financial statements in our independent auditor's report or, if those disclosures are insufficient, modify our opinion. Our conclusions are based on audit evidence obtained up to the date of our independent auditor's report. However, future events or conditions may cause the Company to become unable to continue as a going concern;
- evaluate the overall presentation of the financial statements, their structure and content, including disclosures, and assessing whether the financial statements and their underlying transactions and events present a fair view of them.

We communicate with those charged with corporate governance, bringing to their attention, including information about the planned scope and timing of the audit, and significant issues that have attracted the attention of the auditor, including significant deficiencies in the internal control system that we identified during the audit process.

**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS  
FOR THE YEAR ENDED 31 DECEMBER 2024**

**1. GENERAL INFORMATION**

SkyBridge Invest Joint Stock Company (hereinafter – the “Company”) and its subsidiaries (hereinafter together – the “Group”) was registered in accordance with the legislation of the Republic of Kazakhstan in 2003. The Group’s activities are regulated by the Agency of the Republic of Kazakhstan for regulation and development of financial market (hereinafter – the “Agency”) and are performed based on the license No. 4.2.192/113 dated 20 July 2016, which allows to perform the following activities:

- 1) brokerage and dealing activities at the securities market with the right to keep clients’ accounts as a nominal holder;
- 2) investment portfolio management activities, including investment management without the right to attract voluntary pension contributions.

The Company's main activities include management of investment portfolios of joint stock investment and mutual funds, investment of clients’ assets in fiduciary management as well as brokerage and dealing activities with the right to keep clients’ accounts as a nominal holder and financial consulting services.

The Company has following licenses:

- 1) License No. 4.3.20 dated July 18, 2023 to conduct banking operations, issued by the Agency of the Republic of Kazakhstan for Regulation and Development of the Financial Market (types of activity: exchange operations with foreign currency, with the exception of exchange operations with cash foreign currency);
- 2) License No. 112018-012 dated November 21, 2018 to operate on the territory of the Astana International Financial Center, issued by the Astana International Financial Center Committee for Regulation of Financial Services (types of activity: making investments as a main participant, making investments as an agent, investment management, managing collective investment schemes, consulting on investments, organizing investment transactions).

The Company's main activities include managing investment portfolios of joint-stock investment and mutual funds, investing clients' assets under trust management, as well as brokerage and dealer activities with the right to maintain clients' accounts as a nominee holder, and providing financial consulting services.

Consolidated subsidiaries are represented as follows:

Name of the company	Country of establishment	Date of formation	Main activity	Participation rate, %	
				31 December 2024	31 December 2023
Private company SkyBridge Digital Finance Ltd.	Kazakhstan	08.09.2022	Financial services and investment activities	100.00%	100.00%

Unconsolidated subsidiaries are represented as follows:

Name of the company	Country of establishment	Date of formation	Main activity	Participation rate, %	
				31 December 2024	31 December 2023
Open-ended investment company SBI Adamant Fund *	Kazakhstan	07 April 2020	Investment portfolio management	100.00%	100.00%
SkyBridge Asset Management Sarl *	Luxembourg	27 January 2020	Managing alternative investment funds	100.00%	100.00%

Public company of open investment type SBI Active Fund	Kazakhstan	03 September 2024	Investment portfolio management	100.00%	—

\* In accordance with IFRS 10 Consolidated Financial Statements, the Group has determined that the subsidiary meets the criteria of an investment entity and is carried at fair value through profit or loss.

**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS  
FOR THE YEAR ENDED 31 DECEMBER 2024 (CONTINUED)**

**1. GENERAL INFORMATION (CONTINUED)**

**Shareholders**

As at 31 December 2024 and 2023, the Group's shareholders were:

	<b>31 December 2024</b>	<b>31 December 2023</b>
SB Solutions LLP	<b>100%</b>	<b>100.0%</b>
	<b>100%</b>	<b>100.0%</b>

As at 31 December 2024 SB Solutions LLP has six participants - individuals, none of whom has a controlling stake. The largest of the participants, Mr. Irishev A.B., owns a 30% stake in the authorized capital of SB Solutions LLP. The shares of other participants range from 6% to 18%.

As at 31 December 2024 the address of the Group's registered office is: 14 floor, Capital Tower Business Center, 34, Abish Kekilbaiuly str., 050000, Almaty, the Republic of Kazakhstan.

**2. BASIS OF PREPARATION OF THE CONSOLIDATED FINANCIAL STATEMENTS**

**Statement of compliance**

The consolidated financial statements of the Group have been prepared in accordance with International Financial Reporting Standards (hereinafter – “IFRSs”).

**Basis of preparation**

The consolidated financial statements have been prepared on the historical cost basis except for certain financial instruments.

**Functional and presentation currency**

The consolidated financial statements were presented in tenge, the currency of the economic environment in which the Group operates. For the purposes of these consolidated financial statements, the financial results and financial position of the Group are expressed in tenge (hereinafter - “tenge”), which is the functional and presentation currency for these consolidated financial statements.

**3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES**

The accounting policies described below have been applied consistently by the Group in all reporting periods presented in these consolidated financial statements.

**Consolidation principles**

*Subsidiaries*

Subsidiaries are entities controlled by the Group. The Group controls a subsidiary when the Group is exposed to, or entitled to, variable income from participation in an investee and has the ability to exercise its power over the entity to influence the amount of that income. In particular, the Group consolidates investees over which it exercises de facto control. The financial statements of subsidiaries are included in the consolidated financial statements from the date control is acquired until the date it ceases.

*Acquisitions and sales of non-controlling interests*

The Group treats acquisitions and disposals of non-controlling interests in its consolidated financial statements as transactions with shareholders. Any difference between the amount by which non-controlling interests have been adjusted and the fair value of the consideration paid or received is recognized directly in equity and is attributable to the owners of the parent company.

**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS  
FOR THE YEAR ENDED 31 DECEMBER 2024 (CONTINUED)**

**3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)**

*Transactions eliminated on consolidation*

Transactions between members of the Group, balances due on such transactions, and unrealized gains arising from these transactions are eliminated in the process of preparing the consolidated financial statements. Unrealized gains from transactions with associates are excluded from the consolidated financial statements in an amount equal to the Group's share in these organizations. Unrealized gains from transactions with associates are excluded from the consolidated financial statements in correspondence with the investment account in these entities. Unrealized losses are eliminated from the consolidated financial statements in the same way as profits, unless there is an indication of impairment.

**Standards and interpretations adopted this year**

The accounting policy adopted in the preparation of these consolidated financial statements is consistent with that applied in the preparation of the Group's financial statements for the year ended 31 December 2023, except for the newly adopted standards and interpretations effective as at 1 January 2024. The Group has not early adopted any other standard, interpretation or amendment that has been issued, but not yet effective.

*New and amended IFRS standards that came into effect this year*

- Amendments to IAS 7 Statement of Cash Flows and IFRS 7 Financial Instruments: Disclosures Related to Supplier Financing Arrangements;
- Amendments to IAS 1 Classification of Liabilities as Current or Non-Current;
- Amendments to IFRS 16 Leases – Lease Liabilities in Sale and Leaseback Transactions.

These amendments did not have a material impact on the Group's consolidated financial statements.

**New and revised IFRS standards issued but not yet effective**

- Amendments to IAS 21 Currency Convertibility Limitations;
- IFRS 18 Presentation and Disclosure in Financial Statements;
- IFRS 19 Subsidiaries without Public Accounts: Disclosures.

The Group's management does not expect that the application of these standards will have a material impact on the Group's consolidated financial statements in future reporting periods.

**Fair value measurement**

The Group measures financial assets at fair value through profit or loss (FVPL) and at fair value through other comprehensive income (FVOCI), at fair value at each reporting date.

Fair value is the price that would have been received for the sale of an asset or paid for the transfer of a liability in a transaction that is normally conducted between market participants at the valuation date. The fair value measurement assumes that a transaction to sell an asset or transfer a liability occurs:

- either in the main market for this asset or liability;
- or, in the absence of a primary market, in the most favorable market for the asset or liability.

The Group must have access to the main or most favorable market. The fair value of an asset or liability is measured using assumptions that market participants would use to determine the price of the asset or liability, assuming that market participants are acting in their best interests. The fair value measurement of a non-financial asset considers the ability of a market participant to generate economic benefits from using the asset in the best and most efficient way or selling it to another market participant who will use this asset in the best and most efficient way.

The Group uses valuation techniques that are acceptable in the circumstances and for which sufficient data are available to measure fair value, while maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS  
FOR THE YEAR ENDED 31 DECEMBER 2024 (CONTINUED)

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

**Fair value measurement (continued)**

All assets and liabilities whose fair value is measured or disclosed in the consolidated financial statements are classified within the hierarchy of fair value sources described below based on the lowest level of input data that is relevant to the overall fair value measurement:

- Level 1 – quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date;
- Level 2 – valuation models in which inputs that are relevant to fair value measurements that relate to the lowest level of the hierarchy are directly or indirectly observable in the market.
- Level 3 – valuation models in which inputs that are relevant to fair value measurements that relate to the lowest hierarchy level are not observable in the market.

In the case of assets and liabilities that are recognized in the consolidated financial statements on a periodic basis, the Group determines the fact of transfer between levels of hierarchy sources, re-analyzing the classification (based on the initial data of the lowest level, which are significant for assessing the fair value as a whole) at the end of each reporting period.

**Financial instruments**

*Initial recognition*

*Date of recognition*

The purchase or sale of financial assets and liabilities on standard terms is recognized at the date of transaction, i.e. on the date when the Group undertakes to purchase an asset or liability. A purchase or sale on standard terms includes the purchase or sale of financial assets and liabilities within the framework of an agreement, under the terms of which the delivery of assets and liabilities is required within the period established by the rules or agreements adopted on the market.

*Initial assessment*

The classification of financial instruments upon initial recognition depends on the contractual terms and the business model used to manage the instruments. Financial instruments are initially measured at fair value, including transaction costs, unless financial assets and financial liabilities are measured at fair value basis.

*Categories of valuation of financial assets and liabilities*

The Group classifies all its financial assets based on the business model used for asset management and the contractual terms of the assets as being valued at:

- Amortized cost;
- FVOCI;
- FVPL.

The Group classifies and evaluates creds and instruments held for trading in accordance with FVPL. The Group may, at its discretion, classify financial instruments as valued in accordance with FVPL, if such a classification eliminates or significantly reduces the inconsistency in applying the principles of measurement or recognition.

Financial liabilities are measured at amortized cost, or at FVPL if they are held for trading and derivatives or are classified at the entity's discretion as measured at fair value.

*Debt instruments valued at FVOCI*

The Group evaluates debt instruments at FVOCI if both of the following conditions are met:

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

**3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)**

**Financial instruments (continued)**

- the instrument is held in the framework of a business model, the goal of which is achieved both by obtaining the cash flows stipulated by the contract and by selling financial assets;
- the contractual terms of the financial asset comply with the SPPI test criteria.

FVOCI debt instruments are subsequently measured at fair value, and gains or losses resulting from changes in fair value are recognized in other comprehensive income. Interest income and gains or losses on changes in foreign exchange rates are recognized in profit or loss in the same manner as for financial assets at amortized cost. Upon derecognition, accumulated gain or loss previously recognized in other comprehensive income is reclassified from the other comprehensive income to profit or loss.

*Debt instruments valued at FVOCI (continued)*

Expected credit losses for debt instruments measured at FVOCI do not reduce the carrying amount of these financial assets in the statement of financial position, which continue to be measured at fair value. Instead, an amount equal to the reserve for expected credit losses that would have been created when the asset was measured at amortized cost is recognized in other comprehensive income as the accumulated impairment amount with the corresponding amounts recognized in profit or loss. The cumulative amount of losses recognized in other comprehensive income and estimate statements is reclassified to profit or loss upon derecognition of the asset.

**Cash and cash equivalents**

Cash and cash equivalents consist of cash on hand, bank accounts and amounts due from credit institutions that mature within ninety days of the date of origination and are free from contractual encumbrances.

**Reclassification of financial assets and liabilities**

The Group does not reclassify financial assets after their initial recognition, except in certain cases, when it changes the financial asset management business model. Financial liabilities are never reclassified.

**Repurchase and reverse repurchase agreements**

Sale and repurchase agreements ("repos") are treated as secured financing transactions. Securities sold under sale and repurchased agreements are retained in the statement of financial position and, in case the transferee has the right by contract or custom to sell or repledge them, reclassified as securities pledged under sale and repurchase agreements. The corresponding liability is presented within amounts due to credit institutions or customers.

Securities purchased under repurchase agreements with an obligation to resell ("reverse repos") are included in cash and cash equivalents, due from credit institutions or loans to customers, as appropriate. The difference between the purchase price and the resale price represents interest income and is recognized in profit or loss over the period of the repo transaction using the effective interest method.

**Offsetting of financial instruments**

Financial assets and liabilities are offset and the net amount is reported in the statement of consolidated financial position when there is a legally enforceable right to set off the recognised amounts and there is an intention to settle on a net basis, or to realise the asset and settle the liability simultaneously. This is not generally the case with master netting agreements, and the related assets and liabilities are presented gross in the statement of financial position.

**Derecognition of financial assets and liabilities**

*Financial assets*

A financial asset (or, where applicable, part of a financial asset or part of a group of similar financial assets) ceases to be recognized in the statement of financial position if:

- the rights to receive cash flows from the asset have expired;
- the Group transferred the right to receive cash flows from the asset or accepted the obligation to transfer the received cash flows in full without significant delay to a third party under the terms of a "transit" agreement; and
- the Group either (a) transferred almost all the risks and benefits of the asset, or (b) did not transfer, but does not retain all the risks and benefits of the asset but transferred control of the asset.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS  
FOR THE YEAR ENDED 31 DECEMBER 2024 (CONTINUED)

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

**Derecognition of financial assets and liabilities (continued)**

*Financial assets (continued)*

If the Group transferred its rights to receive cash flows from the asset, while neither transferring, nor retaining practically all the risks and benefits associated with it, nor transferring control of the asset, such an asset is accounted for within the ongoing participation of the Group in this asset. Continuation of participation in the asset, which takes the form of a guarantee for the transferred asset, is measured at the lower of the initial carrying amount of the asset and the maximum amount of compensation that may be presented for payment to the Group.

*Financial liabilities*

Financial liability is derecognized when the relevant obligation is fulfilled, cancelled, or expires.

When replacing one existing financial obligation with another obligation to the same creditor, on substantially different conditions, or in the event of significant changes to the conditions of the existing obligation, the initial obligation is deregistered, and the new obligation is recorded with the recognition of the difference in the carrying amount of obligations in the composition profit or loss.

**Expected credit losses recognition**

The Group recognizes the estimated allowance for expected credit losses on financial assets measured at amortized cost and fair value through other comprehensive income in an amount equal to expected credit losses for the entire period if the credit loss has increased significantly since initial recognition. The Group does not reduce the carrying amount of a financial asset at fair value through other comprehensive income but recognizes an estimated reserve in other comprehensive income.

In determining whether there is a significant increase in the credit risk of a financial asset since its initial recognition, the Group focuses on changes in the risk of a default occurring over the life of the credit instrument, and not on changes in the amount of expected credit losses. If the terms and conditions of the cash flows for a financial asset stipulated by the agreement have been revised or modified and the recognition of the financial asset has not been terminated, the Group assesses whether the credit risk for the financial instrument has changed significantly by comparing:

- risk assessment of default as at the reporting date (based on modified contractual terms);
- risk assessment of the occurrence of default upon initial recognition (based on the initial unmodified contractual terms)

If there is no significant increase in credit risk, the Group recognizes an allowance for losses on a financial asset in the amount equal to 12-month expected credit losses, except for:

1. acquired or created credit-impaired financial assets;
2. trade receivables; and
3. lease receivables.

For financial assets referred to in paragraphs (1)-(3), the Group estimates the allowance for losses in the amount of expected credit losses for the entire term.

If in the previous reporting period the Group estimated the estimated allowance for losses on a financial instrument in an amount equal to the expected credit losses for the entire period, but as at the current reporting date determines that there is no significant increase in credit risk, then at the current reporting date the Group should evaluate the estimated a provision equal to 12-month expected credit losses.

**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS  
FOR THE YEAR ENDED 31 DECEMBER 2024 (CONTINUED)**

**3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)**

**Expected credit losses recognition (continued)**

The Group recognizes, as profit or loss from impairment, the amount necessary to adjust the estimated allowance for losses to the amount of expected credit losses as at the reporting date.

For acquired or created credit-impaired financial assets, the Group recognizes favorable changes in expected credit losses for the whole term as a recovery of impairment losses, even if the expected credit losses for the whole period are less than the expected credit losses that were included in the estimated cash flows at initial recognition.

Assessment of expected credit losses the Group estimates expected credit losses on a financial instrument in a manner that reflects:

- an unbiased and weighted amount of probability, determined by assessing the range of possible results;
- the time value of money;
- reasonable and confirmed information about past events, current conditions and projected future economic conditions available at the reporting date.

The maximum period considered in assessing expected credit losses is the maximum period under the contract (including extension options) during which the Group is exposed to credit risk.

To achieve the goal of recognizing expected credit losses for the entire period arising from a significant increase in credit risk since initial recognition, it may be necessary to assess a significant increase in credit risk on a group basis, for example, by analyzing information indicating a significant increase in credit risk for a group or subgroup of financial instruments. This ensures that the Group achieves the goal of recognizing expected credit losses for the entire period in the event of a significant increase in credit risk, even if confirmation of such a significant increase in credit risk at the level of an individual instrument is not yet available.

**Taxation**

The current corporate income tax charge is calculated in accordance with the regulations of the Republic of Kazakhstan.

Deferred corporate income tax assets and liabilities are calculated in respect of all temporary differences using the liability method. Deferred corporate income tax is provided for all temporary differences arising between the tax bases of assets and liabilities and their carrying values for financial reporting purposes, except where the deferred corporate income tax arises from the initial recognition of goodwill or of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss.

A deferred corporate income tax asset is recorded only to the extent that it is probable that taxable profit will be available against which the deductible temporary differences can be utilized. Deferred corporate income tax assets and liabilities are measured at tax rates that are expected to apply to the period when the asset is realized or the liability is settled, based on tax rates that have been enacted or substantively enacted at the reporting date.

In addition, the Republic of Kazakhstan has various operating taxes applicable to the activities of the Group. These taxes, in addition to corporate income tax, are included in the statement of comprehensive income as general and administrative expenses.

**Property and equipment**

Property and equipment are carried at cost, excluding the costs of day-to-day servicing, less accumulated depreciation and any accumulated impairment. Such cost includes the cost of replacing part of equipment when that cost is incurred if the recognition criteria are met.

The carrying amounts of property and equipment are reviewed for impairment when events or changes in circumstances indicate that the carrying amount may not be recoverable.

**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS  
FOR THE YEAR ENDED 31 DECEMBER 2024 (CONTINUED)**

**3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)**

**Property and equipment (continued)**

Depreciation of an asset begins when it is available for use. Depreciation is calculated on a straight-line basis over the following estimated useful lives:

	<i>Useful life in years</i>
Capital improvements of leased office	4-5
Machinery and equipment	3-10
Motor vehicles	10
Furniture	5-10

The asset's residual values, useful lives and methods are reviewed, and adjusted as appropriate, at each financial year-end. Costs related to running repairs and renewals are charged when incurred and included in other operating expenses, unless they qualify for capitalization.

**Leases**

*Right-of-use assets*

The Group recognizes the right-of-use assets at the lease commencement date (i.e., the date on which the underlying asset becomes available for use). Right-of-use assets are measured at cost, less accumulated depreciation and accumulated impairment losses, adjusted for revaluation of lease liabilities. The initial cost of the right-of-use assets includes the amount of the recognized lease liabilities, the initial direct costs incurred, and the lease payments made on or before the lease commencement date, less the lease incentive payments received. If the Group does not have sufficient confidence that it will acquire ownership of the leased asset at the end of the lease term, the recognized right-of-use asset is amortised on a straight-line basis over the shorter of the estimated useful life of the asset or the lease term. Right-of-use assets are reviewed for impairment.

*Lease liabilities*

At the lease commencement date, the Group recognizes lease liabilities measured at the present value of lease payments that will be made over the lease term. Lease payments include fixed payments (including substantially fixed payments) less any incentive payments on leases receivable, variable lease payments that depend on an index or rate, and amounts that are expected to be paid under liquidation value guarantees. Lease payments also include the exercise price of the purchase option if there is sufficient confidence that the Group will exercise the option, and the payment of lease termination penalties if the lease term reflects the Group's potential exercise of the lease termination option. Variable lease payments that are independent of the index or the rate are recognized as expenses in the period in which an event or condition occurs that leads to such payments. To calculate the present value of lease payments, the Group uses the weighted average rate of the National Bank of the Republic of Kazakhstan on loans issued or the rate of attraction of additional borrowed funds at the start date of the lease, if the interest rate stipulated in the lease agreement cannot be easily determined.

After the lease commencement date, the amount of the lease liability increases to reflect the accrual of interest and decreases to reflect the lease payments made. In addition, in the event of a modification, a change in the lease term, a change in substantially fixed lease payments, or a change in the valuation of the option to purchase the underlying asset, the carrying amount of the lease liability is revalued.

*Short-term leases and leases of low-value assets*

The Group applies the recognition exemption for short-term leases to short-term leases (i.e., leases that have a maximum lease term of 12 months at the start of the lease and that do not contain a purchase option). The Group also applies the recognition exemption for leases of low-value assets to office equipment leases. Lease payments for short-term leases and leases of low-value assets are recognized as lease expenses on a straight-line basis over the lease term.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS  
FOR THE YEAR ENDED 31 DECEMBER 2024 (CONTINUED)

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

*Significant judgments in determining the lease term in option-to-extend the contracts*

The Group defines a lease term as a non-cancellable lease period, together with periods for which an option to extend the lease is available if there is sufficient certainty that it will be exercised, or periods for which an option to terminate the lease is available if there is sufficient certainty that it will not be exercised.

**Intangible assets**

Intangible assets include software, license agreements, and a trading platform as part of other intangible assets. Intangible assets acquired separately are measured at cost at initial recognition. After initial recognition, intangible assets are carried at cost less accumulated depreciation and accumulated impairment losses. Depreciation is calculated on a straight-line basis over the following estimated useful lives:

	Useful life, in years
Licenses	2-7
Software	1-10
Other intangible assets	1-10

**Provisions**

Provisions are recognized when the Group has a present legal or constructive obligation as a result of past events, and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate of the amount of obligation can be made.

**Retirement and other employee benefit obligations**

The Group does not have any additional pension arrangements separate from the State pension system of the Republic of Kazakhstan, which requires current contributions by the employer calculated as a percentage of current gross salary payments. These expenses are charged in the period the related salaries are earned. The Group has no post-retirement benefits requiring accrual.

**Share capital**

*Share capital*

Common shares are classified as equity. External costs directly attributable to the issue of new shares, other than on a business combination, are shown as a deduction from the proceeds in equity.

Any excess of the fair value of consideration received over the par value of shares issued is recognised as additional paid-in capital.

*Dividends*

Dividends are recognised as a liability and deducted from equity at the reporting date only if they are approved before or on the reporting date. Dividends are disclosed when they are proposed before the reporting date or proposed or declared after the reporting date but before the consolidated financial statements are authorised for issue.

### 3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

#### **Fiduciary assets**

Assets held in fiduciary capacity are not reported in the consolidated financial statements, as they are not the assets of the Group. These assets are reflected in off-balance sheet accounts. Accounting for fiduciary assets is consistent with the Group's accounting policy.

#### **Contingent assets and liabilities**

A contingent asset is not recognized in the statement of financial position but disclosed when an inflow of economic benefits is probable.

A contingent liability is recognized in the consolidated financial statements if, as a result of a particular event in the past, the Group has a legal or voluntary obligation, the settlement of which is likely to require an outflow of resources embodying economic benefits, and the amount of the obligation can be measured in monetary terms with a sufficient reliability. Contingent liabilities are disclosed in the consolidated financial statements when it is unlikely that an outflow of resources due to their redemption will occur.

#### **Revenue and expense recognition**

Revenue is recognized to the extent that it is probable that the economic benefits will flow to the Group and the revenue can be reliably measured. The following specific recognition criteria must also be met before income is recognized:

##### *Interest and similar income and expense*

The Group calculates interest revenue on debt financial assets measured at amortized cost or at FVOCI by applying the EIR to the gross carrying amount of financial assets other than credit-impaired assets. EIR is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument or a shorter period, where appropriate, to the net carrying amount of the financial asset or financial liability. The calculation takes into account all contractual terms of the financial instrument (for example, prepayment options) and includes any fees or incremental costs that are directly attributable to the instrument and are an integral part of the effective interest rate, but not future credit losses. The carrying amount of the financial asset or financial liability is adjusted if the Group revises its estimates of payments or receipts.

The adjusted carrying amount is calculated based on the original effective interest rate and the change in carrying amount is recorded as interest revenue or expense.

When a financial asset becomes credit-impaired, the Group calculates interest revenue by applying the effective interest rate to the net amortized cost of the financial asset. If the financial assets cures and is no longer credit-impaired, the Group reverts to calculating interest revenue on a gross basis.

##### *Revenue*

The Group earns income from a diverse range of services it provides to its customers.

##### *Fee and commission income*

Commission income obtained for rendering the services during a certain period of time are accrued during this period. These items include commission income and fees.

Fees arising from negotiating or participating in the negotiation of a transaction for a third party – such as where the Group's performance obligation is the arrangement of the acquisition of shares or other securities or the purchase or sale of businesses – are recognized on completion of the underlying transaction. Fees or components of fees that are linked to certain performance obligations are recognized after fulfilling the corresponding criteria. When the contract provides for a variable consideration, fee and commission income is only recognized to the extent that it is probable that a significant reversal in the amount of cumulative revenue recognized will not occur until the uncertainty associated with the variable consideration is subsequently resolved.

Commissions received for the provision of services during a certain period of time are accrued during this period as the relevant duties are fulfilled. Such items include commission income and remuneration for asset management, income from the services of a nominee broker custody and other management and consulting services.

**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS  
FOR THE YEAR ENDED 31 DECEMBER 2024 (CONTINUED)**

**3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)**

**Revenue and expense recognition (continued)**

*Expenses*

Expenses are recognised on an accrual basis when the services are provided to the Group.

**Foreign currency recalculation**

The consolidated financial statements are presented in Kazakhstani tenge, which is the Group's functional and presentation currency. Transactions in foreign currencies are initially recorded at the functional currency market rate at the date of the transaction established by the National Bank of the Republic of Kazakhstan. Monetary assets and liabilities denominated in foreign currencies are retranslated in the functional currency at the official exchange rate established by the Kazakhstan Stock Exchange (hereinafter – the “KASE”) and valid at the reporting date. Gains and losses resulting from the translation of foreign currency transactions are recognized in the statement of comprehensive income as gains less losses from foreign currencies – exchange rate differences.

Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the official exchange rates established by KASE as at the date of the initial transaction. Non-monetary items measured at fair value in a foreign currency are translated using the official exchange rates established by KASE at the date when the fair.

Differences between the contractual exchange rate of a transaction in a foreign currency and the market exchange rate on the date of the transaction are included in gains less losses from dealing in foreign currencies.

The market exchange rates as at 31 December 2024 and 2023 were:

	2024	2023	31 December 2024	31 December 2023
US dollars	469.44	456.31	525.11	454.56
Euro	507.86	493.33	546.74	502.24

**4. SIGNIFICANT ACCOUNTING JUDGEMENTS AND ESTIMATES**

For application of the Group's accounting policies, management has used its judgments and made estimates in determining the amounts recognized in the consolidated financial statements. The most significant use of judgments and estimates are as follows:

*Accounting of an enterprise as an investment organization*

Companies that meet the definition of an investment Group under IFRS 10 should measure their subsidiaries at fair value through profit or loss, rather than consolidate them. The criteria that define an investment organization are as follows:

- An organization that receives funds from one or more investors for the purpose of providing investment management services to that investors;
- An organization that makes a commitment to investors that the purpose of its business is to invest funds solely for the purpose of generating value-added income, investment income, or both;
- An entity that evaluates and determines the performance of virtually all of its investments based on their fair value.

#### 4. SIGNIFICANT ACCOUNTING JUDGEMENTS AND ESTIMATES (CONTINUED)

##### *Accounting of an enterprise as an investment organization(continued)*

The Group's charter documents detail its purpose - to provide investors with investment management services, which include investments in stocks, fixed income securities and private investments with the aim of generating profits in the form of investment income and capital gains.

The Group reports to its investors through quarterly investment information, and to its management through internal management reports based on fair value. All investments are carried at fair value to the extent permitted by IFRS in the Group's consolidated financial statements. The Group has a clearly documented exit strategy for all its investments.

The Board also concluded that the Group meets the additional characteristics of an investment entity, as it has more than one investment; the Group's ownership interests are primarily in the form of shares; it has more than one investor, and its investors are not related parties. The Management Board concluded that the Group meets the definition of an investment entity. These findings will be constantly reviewed when any of these criteria or characteristics change.

##### *Fair value of financial instruments*

Where the fair value of financial assets and financial liabilities as reported in the statement of financial position cannot be determined based on prices in an active market, they are determined using various valuation models, including mathematical models. The inputs for such models are determined based on the observable market, if possible; otherwise, judgment is required to determine fair value.

##### *Expected credit losses*

The measurement of impairment losses under IFRS 9 across all categories of financial assets requires judgement, in particular, when determining ECLs / impairment losses and assessing a significant increase in credit risk, it is necessary to evaluate the amount and timing of future cash flows and the value of collateral. These estimates are driven by several factors, changes in which can result in different levels of allowances. The Group's ECL calculations are outputs of complex models with a number of underlying assumptions regarding the choice of variable inputs and their interdependencies. Elements of the ECL models that are considered accounting judgements and estimates include:

- the Group's internal credit grading model, which assigns PDs to the individual grades;
- the Group's criteria for assessing if there has been a significant increase in credit risk and so allowances for financial assets should be measured on a LTECL basis and the qualitative assessment;
- development of ECL models, including the various formulae and the choice of inputs;
- identification of the relationships between macroeconomic scenarios and economic data, for example, unemployment rate and collateral value, as well as the impact on the probability of default (PD), the value at risk of default (EAD) and the level of loss in default (LGD);
- selection of forward-looking macroeconomic scenarios and their probability weightings, to derive the economic inputs into the ECL models.

##### *Lease - estimation of the rate of raising additional borrowed funds.*

The Group cannot readily determine the interest rate implicit in the lease, therefore, it uses its incremental borrowing rate (IBR) to measure lease liabilities. The IBR is the rate of interest that the Group would have to pay to borrow over a similar term, and with a similar security, the funds necessary to obtain an asset of a similar value to the right-of-use asset in a similar economic environment. The IBR therefore reflects what the Group 'would have to pay', which requires estimation when no observable rates are available or when they need to be adjusted to reflect the terms and conditions of the lease.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS  
FOR THE YEAR ENDED 31 DECEMBER 2024 (CONTINUED)

4. SIGNIFICANT ACCOUNTING JUDGEMENTS AND ESTIMATES (CONTINUED)

*Taxation*

Kazakhstan currently has a single Tax Code that regulates main taxation matters. The existing taxes include value added tax, corporate income tax, social and other taxes. Implementation of these regulations is often unclear or non-existent and an insignificant amount of precedents has been established. Tax declarations, together with other legal compliance areas (as examples, customs and currency control matters) are subject to review and investigation by a number of authorities, which are enabled by law to impose severe fines, penalties and interest charges. These facts create tax risks in Kazakhstan substantially more significant than typically found in countries with more developed tax systems.

Management believes that the Group follows the tax laws of the Republic of Kazakhstan regulating its operations. However, the risk remains that relevant authorities could take differing positions about interpretive tax issues.

5. CASH AND CASH EQUIVALENTS

In thousands of tenge	31 December 2024	31 December 2023
Loans provided under reverse repo transactions	184,002	115,108
Cash in brokerage accounts in US dollars	122,116	25,514
Current accounts in Kazakhstani banks in foreign currency	16,198	11,958
Current accounts in Kazakhstan banks	13,074	12,402
Cash in brokerage accounts in Kazakhstani banks	911	52

**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS  
FOR THE YEAR ENDED 31 DECEMBER 2024 (CONTINUED)**

**22. COMMITMENTS AND CONTINGENCIES**

**The environment in which the financial and economic activities of the Group are carried out**

The economy of the Republic of Kazakhstan continues to show the features inherent in developing countries. Among others, such characteristics include the absence of a freely convertible national currency outside the country and a low level of liquidity of bonds and shares in the markets.

Prospects for the economic stability of the Republic of Kazakhstan substantially depend on the effectiveness of economic measures taken by the Government, as well as the development of the legal, regulatory and political systems that are outside the scope of control of the Group.

The financial condition and future activities of the Group may deteriorate due to continuing economic problems inherent in a developing country.

**The environment in which the financial and economic activities of the Group are carried out(continued)**

Management cannot predict either the degree or duration of economic difficulties or assess their impact, if any, on these consolidated financial statements. The Group's management believes that it is taking all the necessary measures to maintain the economic sustainability of the Group in these conditions. However, further deterioration of the situation in the areas described above may adversely affect the results and financial position of the Group. At the present time it is impossible to determine exactly what this influence might be.

**Legal actions and Claims**

In the ordinary course of business, the Group is subject to legal actions and complaints. The Group believes that the ultimate liability, if any, arising from such actions or complaints will not have a material adverse effect on the financial position or results of operations of the Group. The Group assesses the likelihood of material liabilities arising from individual circumstances and makes provision in its consolidated financial statements only where it is probable that events giving rise to the liability will occur and the amount of the liability can be reasonably estimated.

**23. FINANCIAL RISK MANAGEMENT POLICY**

The Group manages risks through an ongoing process of identification, assessment and monitoring, as well as through the establishment of risk limits and other internal control measures. This process of risk management is critical to the Group's continuing profitability and each individual within the Group is accountable for the risk exposures relating to his or her responsibilities. The Group is exposed to credit risk, liquidity risk and market risk, the latter being subdivided into currency and interest rate risks and equity price risk. It also subject to operating risks.

The independent risk control process does not include business risks such as changes in the environment, technology and industry. They are monitored through the Group's strategic planning process.

*Risk management structure*

The Board of Directors is ultimately responsible for identifying and controlling risks; however, there are separate independent bodies responsible for managing and monitoring risks.

*Board of Directors*

The Board of Directors is responsible for the overall risk management approach and for approving the risk strategies and principles.

*Management Board*

The Management Board has the responsibility to monitor the overall risk process within the Group.

*Risk management*

The Risk Management Unit has the overall responsibility for the development of the risk strategy, implementing and maintaining risk related procedures to ensure an independent control process. This unit is also responsible for monitoring risks associated with the Group's compliance with risk principles, frameworks, policies and limits.

*Risk measurement and reporting systems*

The Group's risks are measured using a method which reflects both the expected loss likely to arise in normal circumstances and unexpected losses, which are an estimate of the ultimate actual loss based on statistical models. The models make use of probabilities derived from historical experience, adjusted to reflect the economic environment. The Group also runs worst case scenarios that would arise in the event that extreme events which are unlikely to occur do, in fact, occur.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS  
FOR THE YEAR ENDED 31 DECEMBER 2024 (CONTINUED)

23. FINANCIAL RISK MANAGEMENT POLICY (CONTINUED)

*Risk measurement and reporting systems(continued)*

Monitoring and controlling risks is primarily performed based on limits established by the Group. These limits reflect the business strategy and market environment of the Group as well as the level of risk that the Group is willing to accept. In addition, the Group monitors and measures the overall risk bearing capacity in relation to the aggregate risk exposure across all risk types and activities.

For all levels throughout the Group, specifically tailored risk reports are prepared and distributed in order to ensure that all business divisions have access to extensive, necessary and up-to-date information.

*Excessive risk concentration*

Concentrations arise when a number of counterparties are engaged in similar business activities, or activities in the same geographic region, or have similar economic features that would cause their ability to meet contractual obligations to be similarly affected by changes in economic, political or other conditions. Concentrations indicate the relative sensitivity of the Group's performance to developments affecting a particular industry or geographical location.

In order to avoid excessive concentrations of risks, the Group's policies and procedures include specific guidelines to focus on maintaining a diversified portfolio. Identified concentrations of credit risks are controlled and managed accordingly.

**Credit risk**

Financial assets, which potentially subject the Group to credit risk, consist principally of cash and cash equivalents, amount due from credit institutions and commission receivable, financial assets measured at fair value through profit or loss and financial assets measured at fair value through other comprehensive income. While the Group may be subject to losses in the event of non-performance by its counterparties, the management of the Group does not expect such losses to occur in the selection of counterparties.

In the opinion of management, the maximum amount of credit risk arising from cash and cash equivalents, funds in credit institutions concluded with local banks is equal to the book value of these assets.

Where financial instruments are recorded at fair value, the amounts in the table represent the current credit risk exposure but not the maximum risk exposure that could arise in the future because of changes in values.

*Impairment assessment*

The Group calculates ECL based on several probability-weighted scenarios to measure the expected cash shortfalls, discounted at an approximation to the EIR. A cash shortfall is the difference between the cash flows that are due to an entity in accordance with the contract and the cash flows that the entity expects to receive. The mechanics of the ECL calculations are outlined below and the key elements are as follows:

PD	The <i>Probability of Default</i> is an estimate of the likelihood of default over a given time horizon. A default may only happen at a certain time over the assessed period, if the facility has not been previously derecognized and is still in the portfolio.
EAD	The <i>Exposure at Default</i> is an estimate of the exposure at a future default date, taking into account expected changes in the exposure after the reporting date, including repayments of principal and interest, whether scheduled by contract or otherwise, expected drawdowns on committed facilities, and accrued interest from missed payments.
LGD	The <i>Loss Given Default</i> is an estimate of the loss arising in the case where a default occurs at a given time. It is based on the difference between the contractual cash flows due and those that the lender would expect to receive, including from the realization of any collateral. It is usually expressed as a percentage of the EAD.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS  
FOR THE YEAR ENDED 31 DECEMBER 2024 (CONTINUED)

23. FINANCIAL RISK MANAGEMENT POLICY (CONTINUED)

Credit risk (continued)

*Impairment assessment (continued)*

The ECL allowance is based on the credit losses expected to arise over the life of the asset (the lifetime expected credit loss or LTECL), unless there has been no significant increase in credit risk since origination, in which case, the allowance is based on the 12 months' expected credit loss (12mECL). The 12mECL is the portion of LTECL that represents the ECLs that result from default events on a financial instrument that are possible within the 12 months after the reporting date. Both LTECL and 12mECL are calculated on either an individual basis or a collective basis, depending on the nature of the underlying portfolio of financial instruments.

The Group has developed a policy to perform an assessment, at the end of each reporting period, of whether a financial instrument's credit risk has increased significantly since initial recognition, by considering the change in the risk of default occurring over the remaining life of the financial instrument.

*Credit quality by classes of financial assets*

The table below presents an analysis of the credit quality in terms of asset classes for the credit-related items of the statement of financial position based on the Group's credit rating system.

31 December 2024	Note		Standard grade	Sub-standard grade	Impaired	Total

Geographical concentration

Investment Committee of the Group exercises control over the risk in the legislation and regulatory arena and assesses its influence on the Group's activity. The Investment Committee is an advisory body of the Group created and approved by the Management Board, which makes investment decisions in respect of own assets and assets under trust management. This approach allows the Group to minimize potential losses from the investment climate fluctuations in the Republic of Kazakhstan. The financial assets and financial liabilities of the Group are concentrated in the Republic of Kazakhstan.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS  
FOR THE YEAR ENDED 31 DECEMBER 2024 (CONTINUED)

23. FINANCIAL RISK MANAGEMENT POLICY (CONTINUED)

**Liquidity risk and funding management**

Liquidity risk is the risk that the Group will be unable to meet its payment obligations when they fall due under normal and stressful circumstances. To limit this risk, management has arranged diversified funding sources in addition to its core deposit base, manages assets with liquidity in mind, and monitors future cash flows and liquidity daily. Also, it manages assets with liquidity in mind, and monitors future cash flows and liquidity daily.

The Group maintains a portfolio of highly marketable and diverse assets that can be easily liquidated in the event of an unforeseen interruption of cash flow.

**Market risk**

Market risk is the risk that the fair value or future cash flows of financial instruments will fluctuate due to changes in market variables such as interest rates, foreign exchanges, and equity prices.

**Currency risk**

Currency risk is the risk that the value of a financial instrument will fluctuate due to changes in foreign exchange rates. The tables below indicate the currencies to which the Group had significant exposure at 31 December 2024 and 2023 years on its monetary assets and liabilities and its forecast cash flows. The analysis calculates the effect of a reasonably possible movement of the currency rate against the tenge, with all other variables held constant on the statement of comprehensive income. The negative amount in the table reflects a potential net reduction in the income, while a positive amount reflects a net potential increase.

Currency	Change in exchange rates in % 2024	Effect on profit before tax 2024	Change in exchange rates in % 2023	Effect on profit before tax 2023
US Dollar	+10.00%	34,265	+10.00%	8,257
	-10.00%	(34,265)	-10.00%	(8,257)
Euro	+10.00%	537	+10.00%	1,998
	-10.00%	(537)	-10.00%	(1,998)

**Equity price risk**

An analysis of the sensitivity of net profit or loss and equity to changes in securities prices (based on positions in effect as at 31 December 2024 and 2023 and a simplified scenario of a 10% decrease or increase in prices of all securities) can be presented as follows:

In thousands of tenge	31 December 2024		31 December 2023	
	Profit or loss	Equity	Profit or loss	Equity
10% increase in securities price	24,546	70,324	29,451	17,194
10% decrease in securities price	(24,546)	(70,324)	(29,451)	(17,194)

**Operational risk**

Operational risk is the risk of loss arising from systems failure, human error, fraud or external events. When controls fail to perform, operational risks can cause damage to reputation, have legal or regulatory implications, or lead to financial loss. The Group cannot expect to eliminate all operational risks, but a control framework and monitoring and responding to potential risks could be effective tools to manage the risks. Controls include effective segregation of duties, access rights, authorization and reconciliation procedures, staff education and assessment processes, including the use of internal audit.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS  
FOR THE YEAR ENDED 31 DECEMBER 2024 (CONTINUED)

---

**24. FAIR VALUE OF FINANCIAL INSTRUMENTS**

**Procedures of fair value measurement**

The Group determines the policies and procedures for both recurring fair value measurement, such as unquoted financial assets at fair value through profit or loss and financial assets through other comprehensive income, unquoted derivatives, investment property and for non-recurring measurement, such as assets held for sale.

External valuers are involved for valuation of significant assets, such as properties, financial instruments measured at fair value through profit or loss and at fair value through other comprehensive income. Involvement of external valuers is decided upon annually after discussion with and approval by the Group's audit committee. Selection criteria include market knowledge, reputation, independence and whether professional standards are maintained. The Group decides, after discussions with the Group's external valuers, which valuation techniques and inputs to use for each case.

On each reporting date, the Group analyses the movements in the values of assets and liabilities which are required to be re-measured or re-assessed as per the Group's accounting policies. For this analysis, the investment committee verifies the major inputs applied in the latest valuation by agreeing the information in the valuation computation to contracts and other relevant documents. Together with the external appraisers, the Group also compares each change in fair value of each asset and liability with relevant external sources to determine whether this change is reasonable. The Group and its external appraisers provide the assessment results on a periodic basis to the audit committee and independent auditors of the Group. In addition, main assumptions used during the appraisal are discussed.

**Fair value hierarchy**

For disclosing the fair values, the Group determined classes of assets and liabilities based on the assets and liabilities nature, characteristics and risks as well as the hierarchy of fair value sources.

The Group uses the following hierarchy for determining the fair value of financial instruments and disclosing information about it, depending on the valuation technique:

- Level 1: quoted (unadjusted) prices in active markets for identical assets or liabilities;
- Level 2: valuation models in which input data relevant to the fair value measurement, belonging to the lowest level of the hierarchy, are directly or indirectly observable in the market.
- Level 3: valuation models in which the inputs relevant to the fair value measurement, belonging to the lowest level of the hierarchy, are not observable in the market.

*Fair value of financial assets and liabilities not carried at fair value*

Fair value of financial assets and liabilities not carried at fair value approximates their carrying amount.

**Valuation methods and assumptions**

The following describes the methodologies and assumptions used to determine fair values for those financial instruments which are not already recorded at fair value in the consolidated financial statements.

*Assets for which fair value approximates carrying value*

For financial assets and financial liabilities that are liquid or have a short-term maturity (less than three months) it is assumed that their fair value approximates to the carrying amount. This assumption is also applied to demand deposits and savings accounts without a specific maturity.

26. RELATED PARTY TRANSACTIONS

In accordance with IAS 24 *Related Party Disclosures*, parties are related if one party could control the other party or exercise significant influence over the other party in making financial or operational decisions. In considering each possible related party relationship, attention is directed to the substance of the relationship, not merely the legal form.

Related parties may enter transactions which unrelated parties might not. Transactions between related parties may not be affected on the same terms, conditions and amounts as transactions between unrelated parties.

The nature of the relationship with related parties with which the Group entered into significant transactions or had significant balances as at 31 December 2024 and 2023 is described in detail below.

<b>Total compensation to key management personnel</b>	<b>348,662</b>	<b>178,583</b>

### 27. CAPITAL ADEQUACY

The Group maintains an actively managed capital base to cover risks inherent in the business. The adequacy of the Group's capital is monitored using, among other measures, the ratios established by the NBRK.

During 2023, the Group had complied in full of all its capital requirements established by the NBRK.

The main goal of capital management for the Group is to ensure compliance with external capital requirements and maintain a high credit rating and capital adequacy ratios necessary to carry out activities and maximize shareholder value.

The NBRK requires from companies managing the investment portfolio to maintain a capital adequacy ratio of not less than 1. Liquid assets and liabilities calculated in accordance with the NBRK requirements.

As at 31 December 2024 and 2023, the Group's capital adequacy ratio exceeded the regulatory minimum and amounted to:

Minimum capital established by the NBRK	184,600	172,500
Capital adequacy ratio	1.91	1.23
